

## In the Oil Fields

CONTINUED FROM PRECEDING PAGE  
tion of saying "Amen" to all that was said.

### Back from France.

Corporal Hugh Weaver, son of R. M. Weaver, well known oil producer of Pittsburgh, arrived in Tulsa yesterday on a short visit with his father, after which they will leave for Muskogee to look over their drilling operations there in the Osage country.

Weaver was in France in months, a member of the 28th division, having enlisted when but 18 years of age, more than four years ago. He served on the border at Camp Stewart, for nine months and then after fighting at Camp Hamon, Ga., left for France.

He does not speak very enthusiastically of France, but considers America the only country worth living in. He saw active service in most of the big battles of the war, and was all through the Chateau Thierry drive, and says the most disagreeable part of it was that he went 7 days without a bath this, he says, is just one of the horrors of war.

### Young Bryan.

John H. Bryan, who is a son of G. W. Bryan, of Tulsa, Pa., who is well known in Tulsa, and is associated with the Wynona Oil company people, has written a book called "Ambulance #44, Encore Des Bleus," which is especially interesting and will not only be read by the friends of the author but by many who have never even heard of the author or his people.

The young man is attending Princeton university and has an introduction by Dr. Lyman Abbott, who, in speaking of the book, says "It is so absolutely in the life that he has not in his mind the readers of the narrative and for this reason the book produces such a reverent effect similar to that which the events produced on the writer." It is amply illustrated.

### Gasoline Market

### Is Stronger.

When the Western Petroleum began a week ago yesterday, buying all the gasoline there was in sight they made it exceedingly difficult for the man who has not had the foresight to load up in advance to fill his contracts. The result is the market has been decided stronger and has made an advance of 1 cent per gallon yesterday.

Messrs. John Carson and A. G. Taylor, who were here yesterday, were duly credited with having been responsible for the strength of the market. They left last night with the good wishes of all the refiners here.

### News From Cotton County.

Among the new rigs going up in the country across the river from Burkhardt are those of the Lone Star Gas company, located in the southwest corner of 25-18-10W. Chapman & McFarlin have rig up for a test in the northeast corner of the northwest of the northeast of 4-18-10W. John C. Gray is putting up a rig for a test on the J. H. Fullam farm in the southwest corner of the northwest of 25-18-10W. Chapman & McFarlin have a rig up for a test in the northeast corner of the northwest of the northeast of 4-18-10W. The Walker Valley Oil company is putting up a rig on the Patterson farm in the southwest corner of the southeast corner of the northeast of 4-18-10W. The Walker Valley Oil company is putting up a rig on the Patterson farm in the southwest corner of the southeast corner of the northeast of 4-18-10W. Stiles and Coleman have a bad hole and will have a skid the rig on their No. 1 Wiley, located in the northeast corner of the southwest of 4-18-10W.

The Midland Oil & Gas Co. is putting up a rig on No. 2 Landis in the southwest corner of the northeast of the southeast corner of the northeast of 25-18-11W.

The Four-Six Oil company is down 150 feet on their test on the school lot in the southeast corner of 25-18-11W.

The Walters Field Oil & Gas Co. is down about 1,600 feet on the Patterson farm test in the northeast corner of the southeast corner of 4-18-10W.

Jake Hamon is drilling at 2,165

feet on his test on the Godfrey farm in the northeast corner of 8-28-10W. He is also down 2,420 feet on his Stephenson farm test in the northeast corner of 8-28-10W.

The Humble Oil company No. 2 well on the Lyons farm in the northwest quarter of 21-18-10W, is drilling at 2,350 feet.

The Texas company is rigged up and waiting on the contract on its test in the southeast of 21-18-10W.

The Carter Oil company is casing to the 2,400 foot level on its Weaver farm test in the northwest corner of the southwest 20-18-10W. Jake Hamon is putting up a standard rig for a test on the Talcott farm in the southwest corner of the southwest 21-18-10W. The cement plugs have all been already drilled out at 2,000 feet and they are ready to drill in the sand.

The Walker Valley Oil company is building a standard rig to drill in the southeast corner of the northeast of the southwest 20-18-10W. The total depths now 2,160.

The Empire Gas & Fuel Co. is down 1,225 feet on the Walker farm test in the southeast corner of the northeast of 4-18-10W.

The company has been set in the prairie No. 2 Hardin farm in the northwest corner of the northeast of the northeast of 29-18-9W, at 2,125 feet and the well is ready to be drilled in.

Keys and others are going to 5,500 feet on the Lynch farm, in the northeast corner of the southwest of the northeast of 29-18-9W. The present depth is 2,500 feet, and the 5½-inch is being pulled.

The Keys No. 2 Meyer farm, in the center of the south line of the southwest of 21-18-10W, is drilling at 2,110 feet.

Keys is drilling at 2,290 feet on the Bohemia farm, in the southwest corner of the northwest of the southwest of 21-18-10W.

The Magnolia Petroleum company No. 2 Hunter farm in the northeast corner of the southwest of the southwest of 21-18-10W, is drilling at 2,610 feet.

The Magnolia No. 3 Jones farm in west of the southwest of the southwest corner of the northeast of the southwest of 21-18-10W, is drilling at 2,610 feet.

The Fortuna Oil company is fishing at 1,800 feet on the Graves farm to the northeast corner of the northeast of 27-18-4E.

The Oklahoma Natural Gas company is drilling at 1,625 feet on the Marlow farm in the northeast corner of the northeast of the southwest of 34-18-4E.

"B" Shaffer has a 5,000,000-foot gasser in his No. 3 well on the Laughlin farm in the northwest corner of the northeast of the northeast of 21-18-5. The sand was found from 1,650 to 1,800 feet and is being drilled deeper at 1,800 feet. No. 5 well on this farm has 500,000 feet of gas and is being drilled, but will be drilled to the 1,175-foot pay. It is in the northwest corner of the southwest of the northeast of the same section. No. 6 well in the southwest corner of the northeast of 21-18-5 is drilling at 2,643 to 2,647 feet.

The Sinclair Oil & Gas Co. test on the Wacoochee allotment in the southwest corner of the northeast of 29-18-7, has the Tucker sand from 2,000 to 2,630 feet and it is now taking 50 barrels of oil and about 5,000,000 feet of gas.

The White Panther Oil company has skidded the rig and is ready to start up on its Wilson farm No. 6, located at the center of the south line of the northeast of the southwest of 21-18-7. The sand was found from 2,643 to 2,647 feet.

The Sinclair Oil & Gas Co. is drilling at 1,410 feet on the Richards No. 2 in the southwest of 28-18-7.

The Texas Company No. 1 Malone farm in the center of the west line of the southwest of the northeast of the southwest of 3-18-9 is drilling at 1,710 feet.

Perkins & Kelley are drilling at 300 feet on the Clemens farm in the southwest corner of the northeast of the southwest of 21-18-7.

Kelley and others No. 2 Timothy farm in the southwest corner of the southwest of 25-18-7 is a rig.

McFay and others No. 3 Timothy farm in the southwest corner of the southwest of 25-18-7 is a rig.

The Texas Company No. 4 West farm in the southwest corner of the southwest of 25-18-7 is a rig.

**Yale.**

The Texas Company No. 5 West farm in the southwest corner of the southwest of 25-18-7 is a rig.

The Midland Oil & Gas Co. is putting up a rig on No. 2 Landis in the southwest corner of the northeast of the southeast corner of the northeast of 25-18-11W.

The Four-Six Oil company is down 150 feet on their test on the school lot in the southeast corner of 25-18-11W.

The Walters Field Oil & Gas Co. is down about 1,600 feet on the Patterson farm test in the northeast corner of the southeast corner of 4-18-10W.

Jake Hamon is drilling at 2,165

feet on his test on the Godfrey farm in the northeast corner of 8-28-10W. He is also down 2,420 feet on his Stephenson farm test in the northeast corner of 8-28-10W.

The Humble Oil company No. 2 well on the Lyons farm in the northwest quarter of 21-18-10W, is drilling at 2,155 feet. No. 3 is shut down after spudding.

The Magnolia Petroleum company No. 4 Myers farm in the southwest corner of the northeast of the northeast of 21-18-10W, is drilling at 2,350 feet.

The Texas company is rigged up and waiting on the contract on its test in the southeast of 21-18-10W.

The Carter Oil company is casing to the 2,400 foot level on its Weaver farm test in the northwest corner of the southwest of the northeast of the southwest 20-18-9W.

The Ohio Cities is putting up a rig for a test on the Talcott farm in the southwest corner of the southwest of 21-18-9W.

The Roxane Petroleum company No. 5 Ford farm in the northwest corner of the southwest of 21-18-9W, is drilling at 2,155 feet.

The New England Pipe Line company is drilling at 2,422 feet on the Haymond No. 3 in the northeast of 12-18-8.

The Magnolia Petroleum company has started rigging up its No. 3 on the Clark farm in the southwest corner of the northeast of 1-18-7.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is making 11,000 feet of gas, but four feet in the center of the west line of the southwest of the northeast of 10-18-7 is drilling at 2,932 feet sand and has been shut in at that depth.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.

The Middle States Petroleum company has a 1,000,000-foot gas well in its No. 2 on the Fox farm in the southwest corner of the northeast of the northeast of 17-18-8.

The Savoy oil company is drilling at 2,630 feet on the Beaver farm in the northeast corner of the northeast of 27-18-8.

The Home Gas company test on the Hunter farm in the northwest corner of the northeast of the northeast of 20-18-6 is drilling at 2,155 feet.

The Magnolia Petroleum company No. 1 in the northeast corner of the southwest of the southwest of 31-18-8 is drilling at 2,100 feet.

The Gypsy on the Ward farm in the southwest corner of the northeast of the northeast of 17-18-8 is drilling at 2,145 feet.
